TRAK-KIT
EASY TRAK
2026

TRAK-KIT : EASY TRAK

LOW PROFILE CROSS SECTION IDEAL FOR SURFACE MOUNTING AND RECESSED WHEN SPACE IS TIGHT

ELEGANT AND EASY INSTALL FOR RESIDENTIAL, RETAIL, COMMERCIAL AND HOSPITALITY

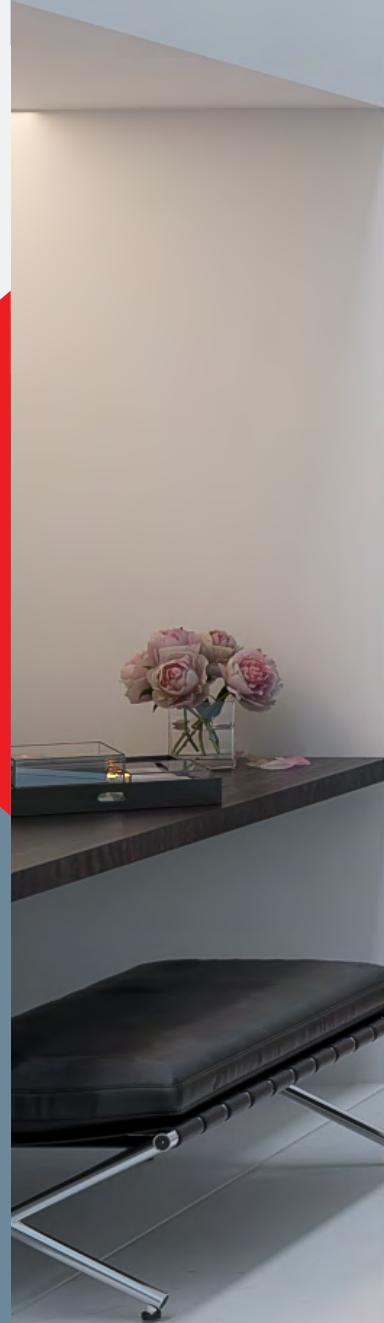

300LBS CAPACITY

MANUAL OR AUTOMATED

EASY TRAK

www.trak-kit.com

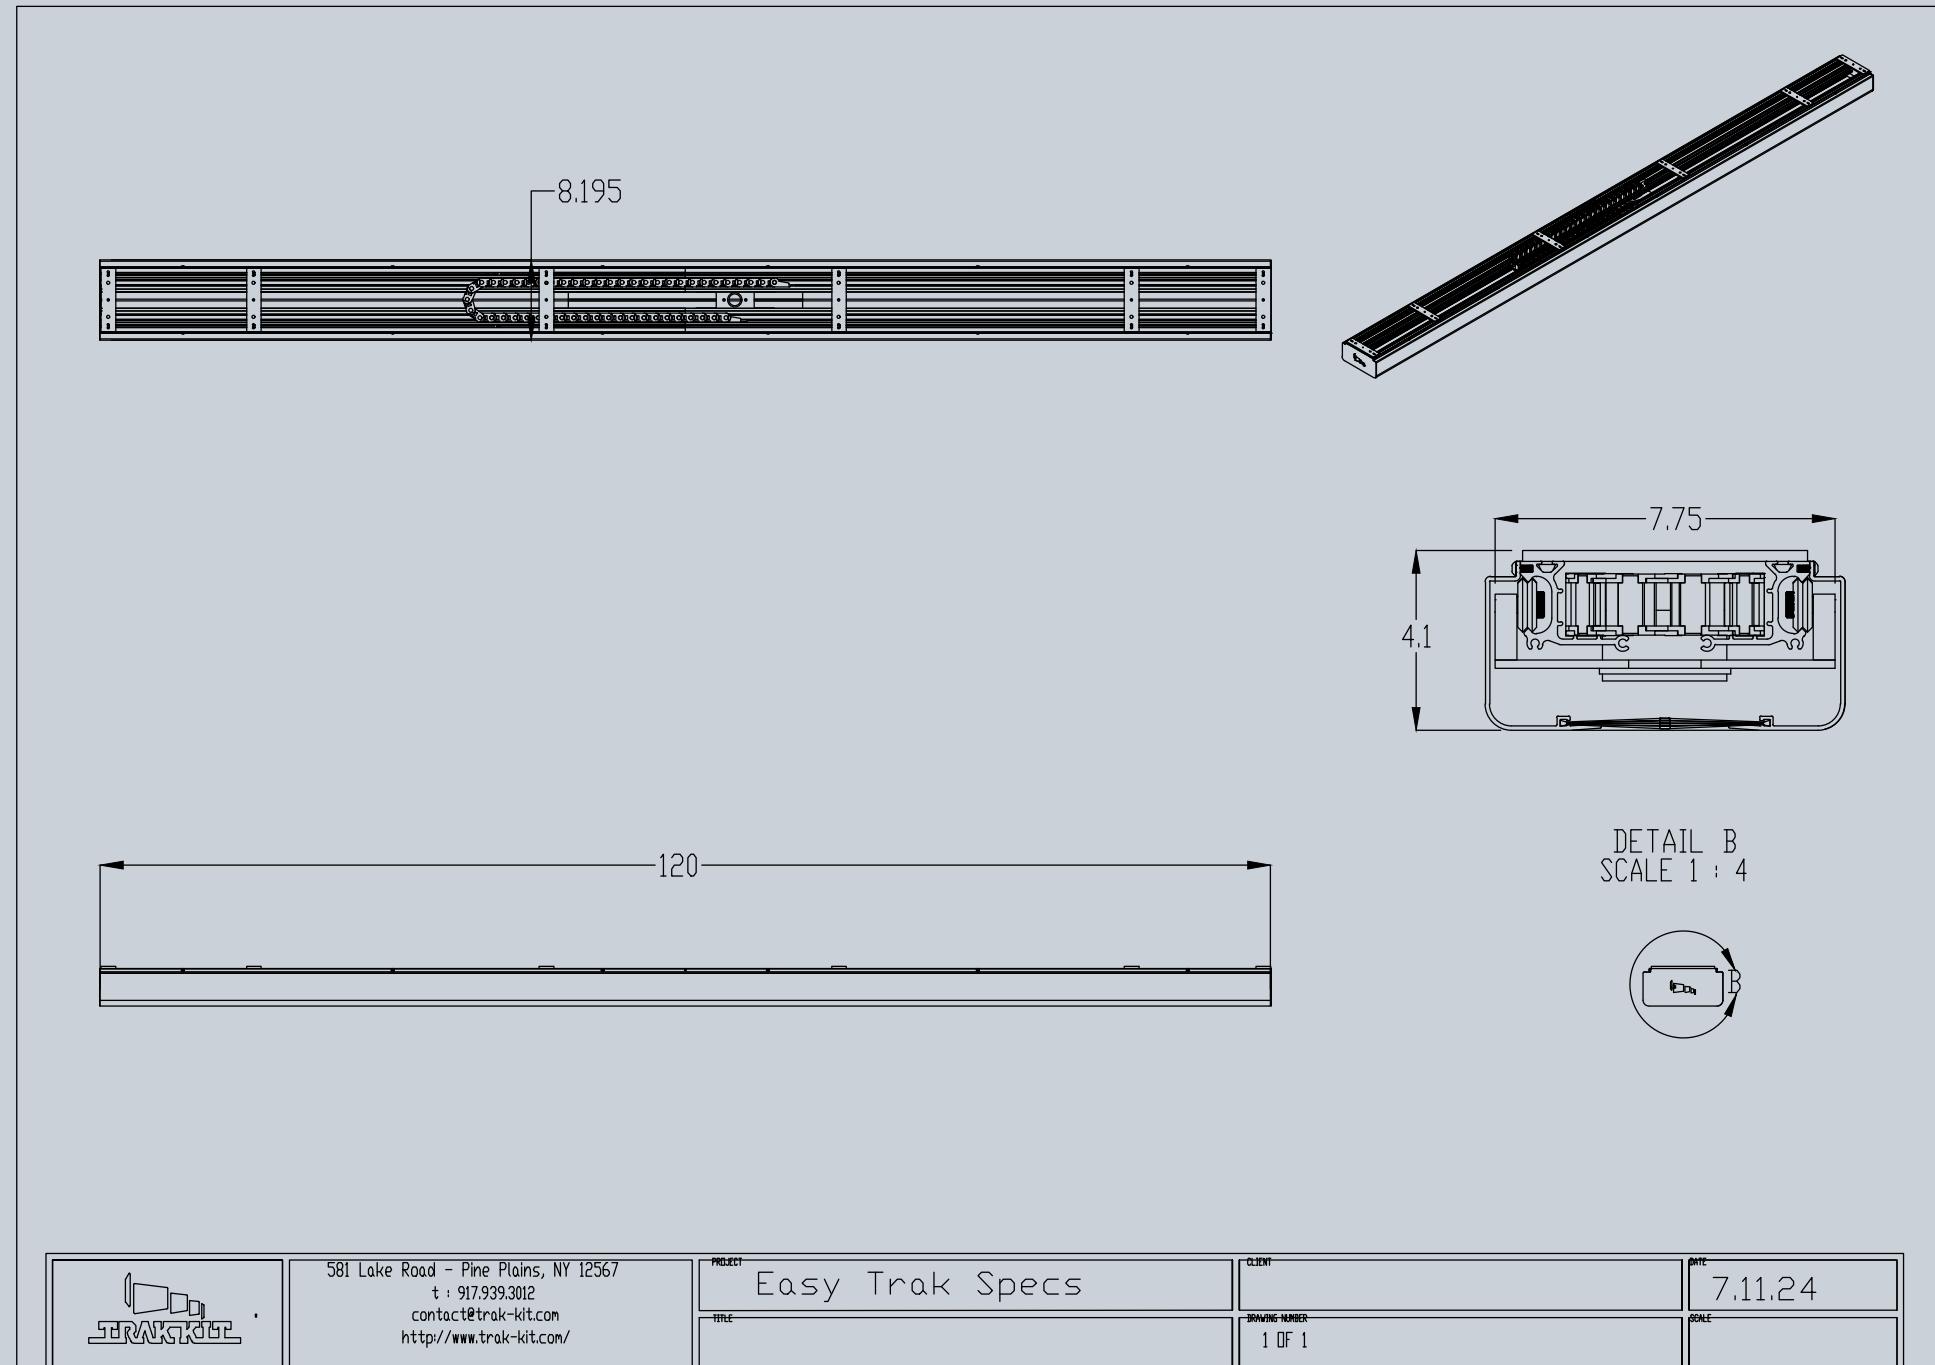

Easy Trak was developed to be installed with minimum effort.

Low profile it can be surface mounted or recessed.

Trak is pre-assembled with trolley and wire management.

Once attached to ceiling, support pole and universal mount attach that can receive any screen up to 75".

Easy Trak can be manual or automated with linear and rotational motion.

TRAK-KIT
DUAL TRAK
2026

TRAK-KIT : DUAL TRAK

IDEAL FOR LARGER SCREENS
AND LONGER TRAVEL

CAN HANDLE BARN DOORS AND LARGE
PANELS

SURFACE MOUNT OR RECESSED

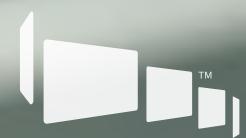

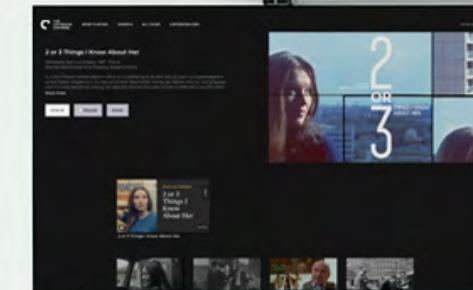

600LBS CAPACITY

MANUAL OR AUTOMATED

DUAL TRAK

www.trak-kit.com

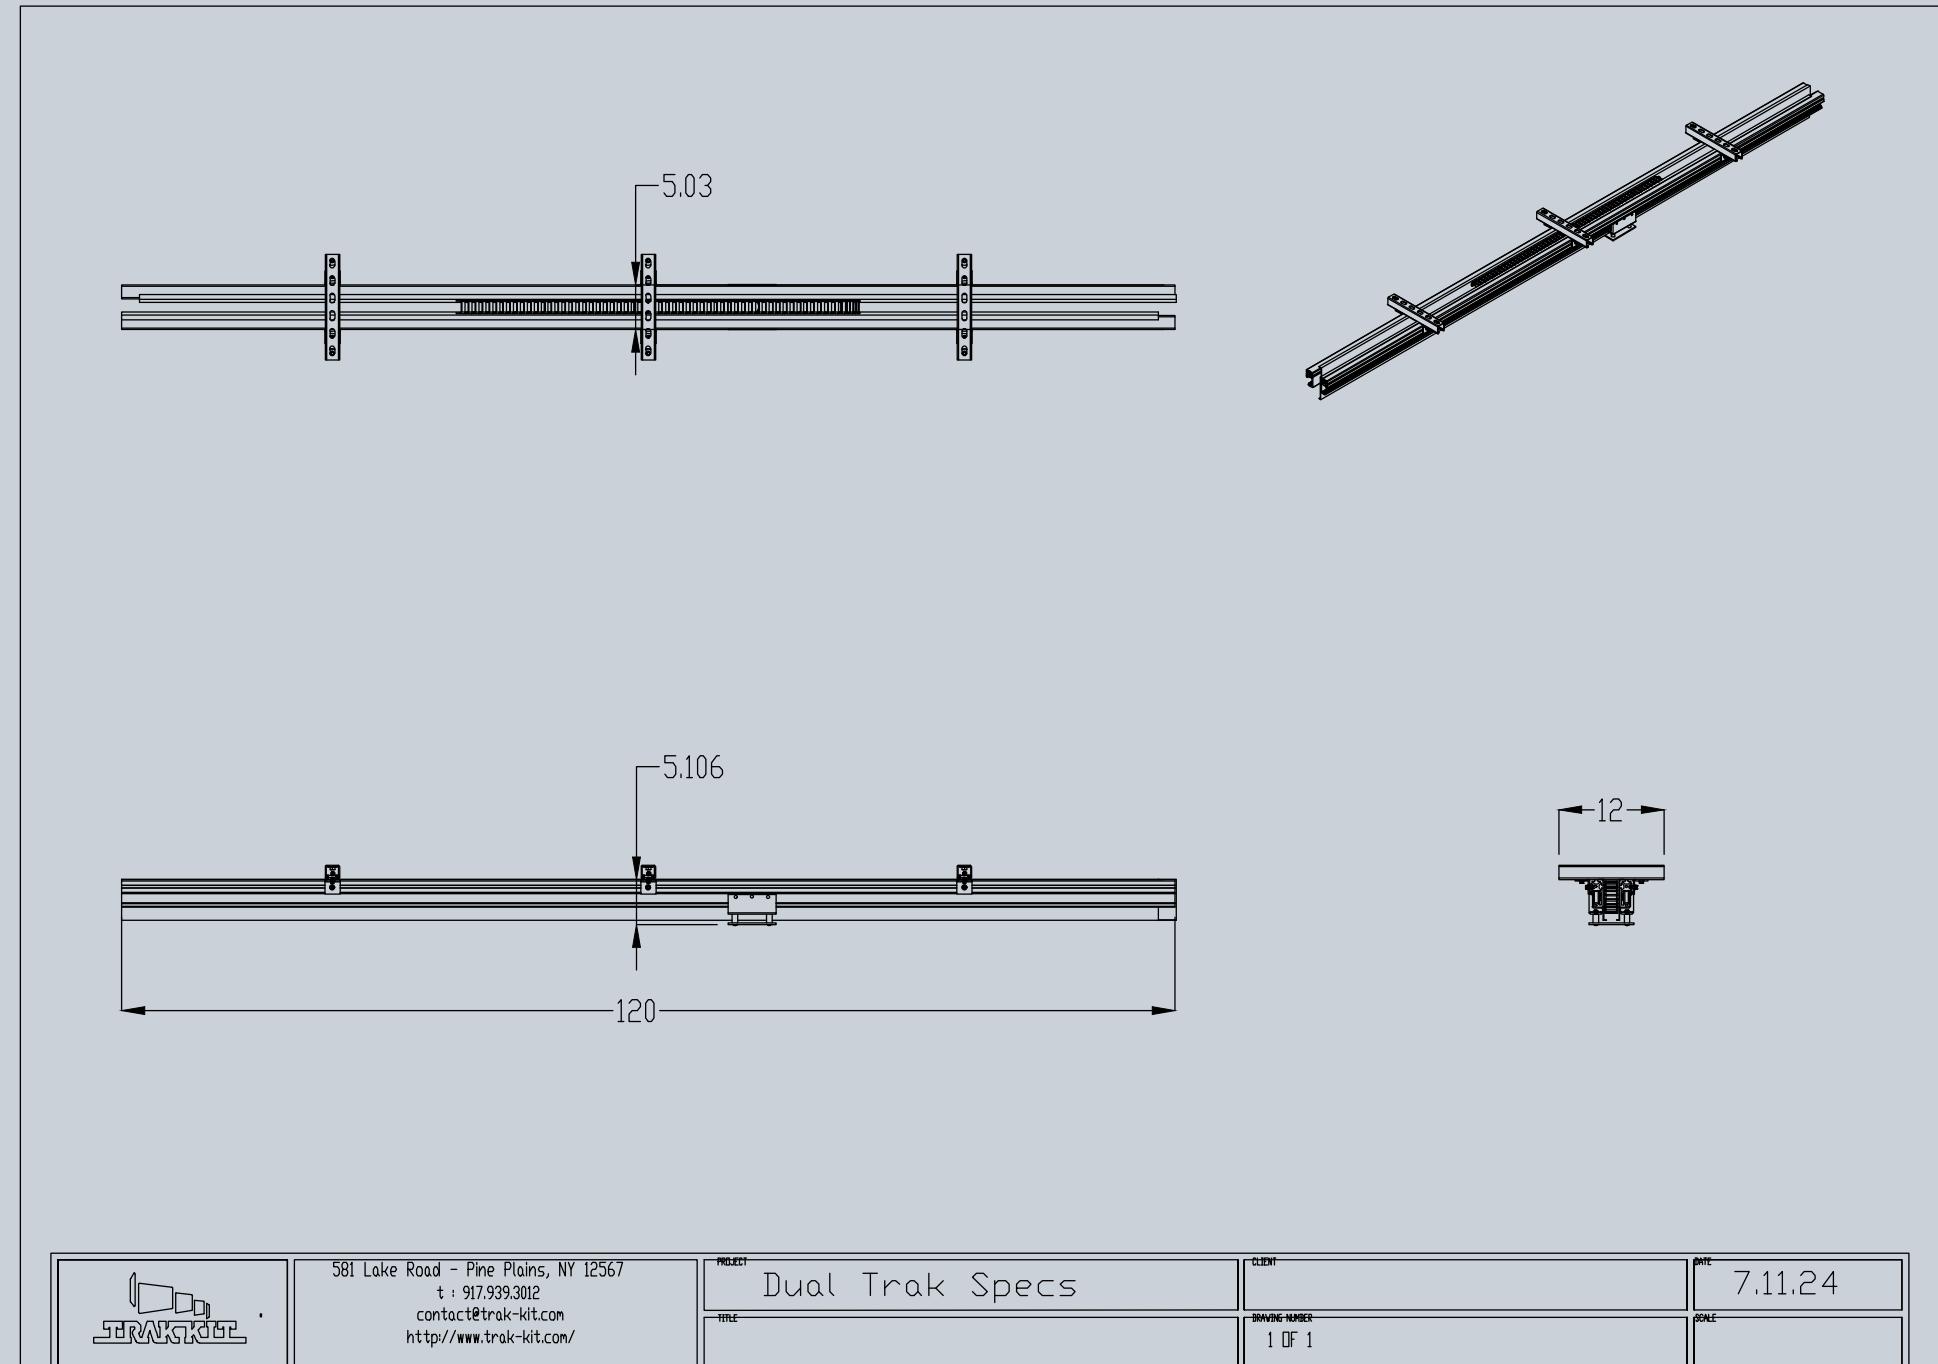

Dual Trak-kit is fully customizable and can carry more weight.

Ideal for large screens 86"-98" as well as panels and large barn doors.

It does all of that while only 6"x6" in cross section.

Can reach lengths of 50' and more. It can also carry multiple screens or panels with wire harness for each panel so it can move independently.

Traks can be recessed or surface mount and can also be manual or fully automated.

TRAK-KITTM
SUPER TRAK
2026

TRAK-KIT : SUPER TRAK

IDEAL FOR EXTRA LARGE SCREENS, VIDEO WALLS AND LONGER TRAVEL

CAN HANDLE BARN DOORS AND LARGE MULTIPLE PANELS

SURFACE MOUNT OR RECESSED

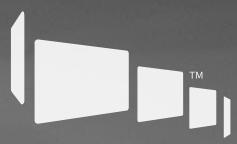

900LBS CAPACITY

MANUAL OR AUTOMATED

SUPER TRAK

www.trak-kit.com

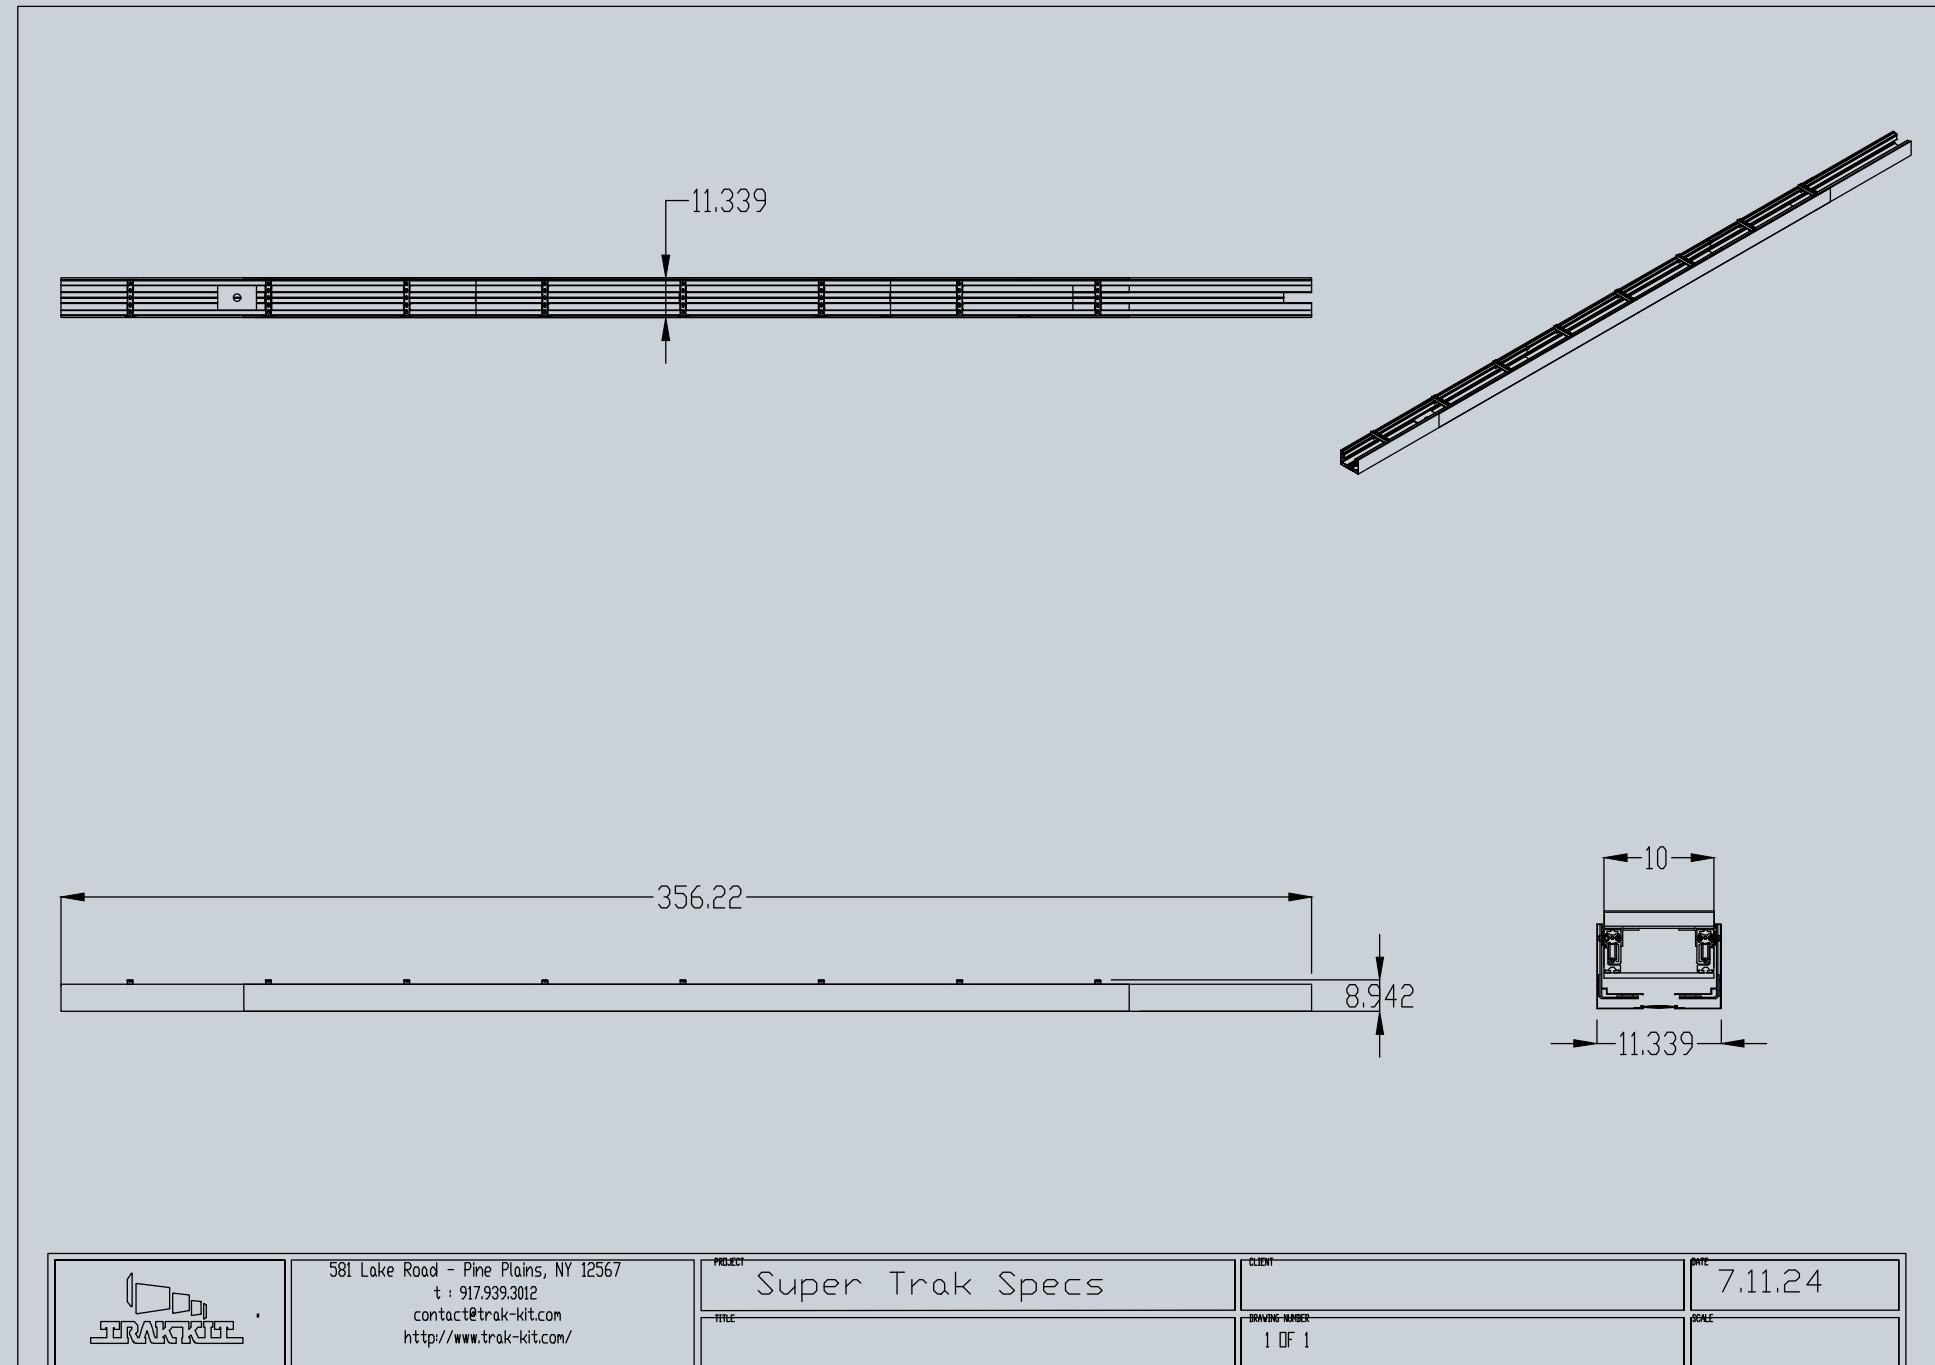

Super Trak-kit is fully customizable and can carry even more weight than Dual Trak.

Ideal for large screens 86"-98" as well as panels and large barn doors.

It has a 12""x6" cross section and can carry multiple panels and video wall. Can reach lengths of more than 50'.

Traks can be recessed or surface mount and can also be manual or fully automated.

Due to a wider cross section, it can handle long 10'+ panels hanging.

TRAK-KIT
TURN TRAK
2026

TRAK-KIT : TURN TRAK

DESIGNED TO HAVE TURNS OR CUSTOM
RADIUS IN THE PATH

IDEAL FOR EXTRA LARGE SCREENS, VIDEO
WALLS AND LONGER TRAVEL

SURFACE MOUNT OR RECESSED

1000LBS CAPACITY

MANUAL OR AUTOMATED

TURN TRAK

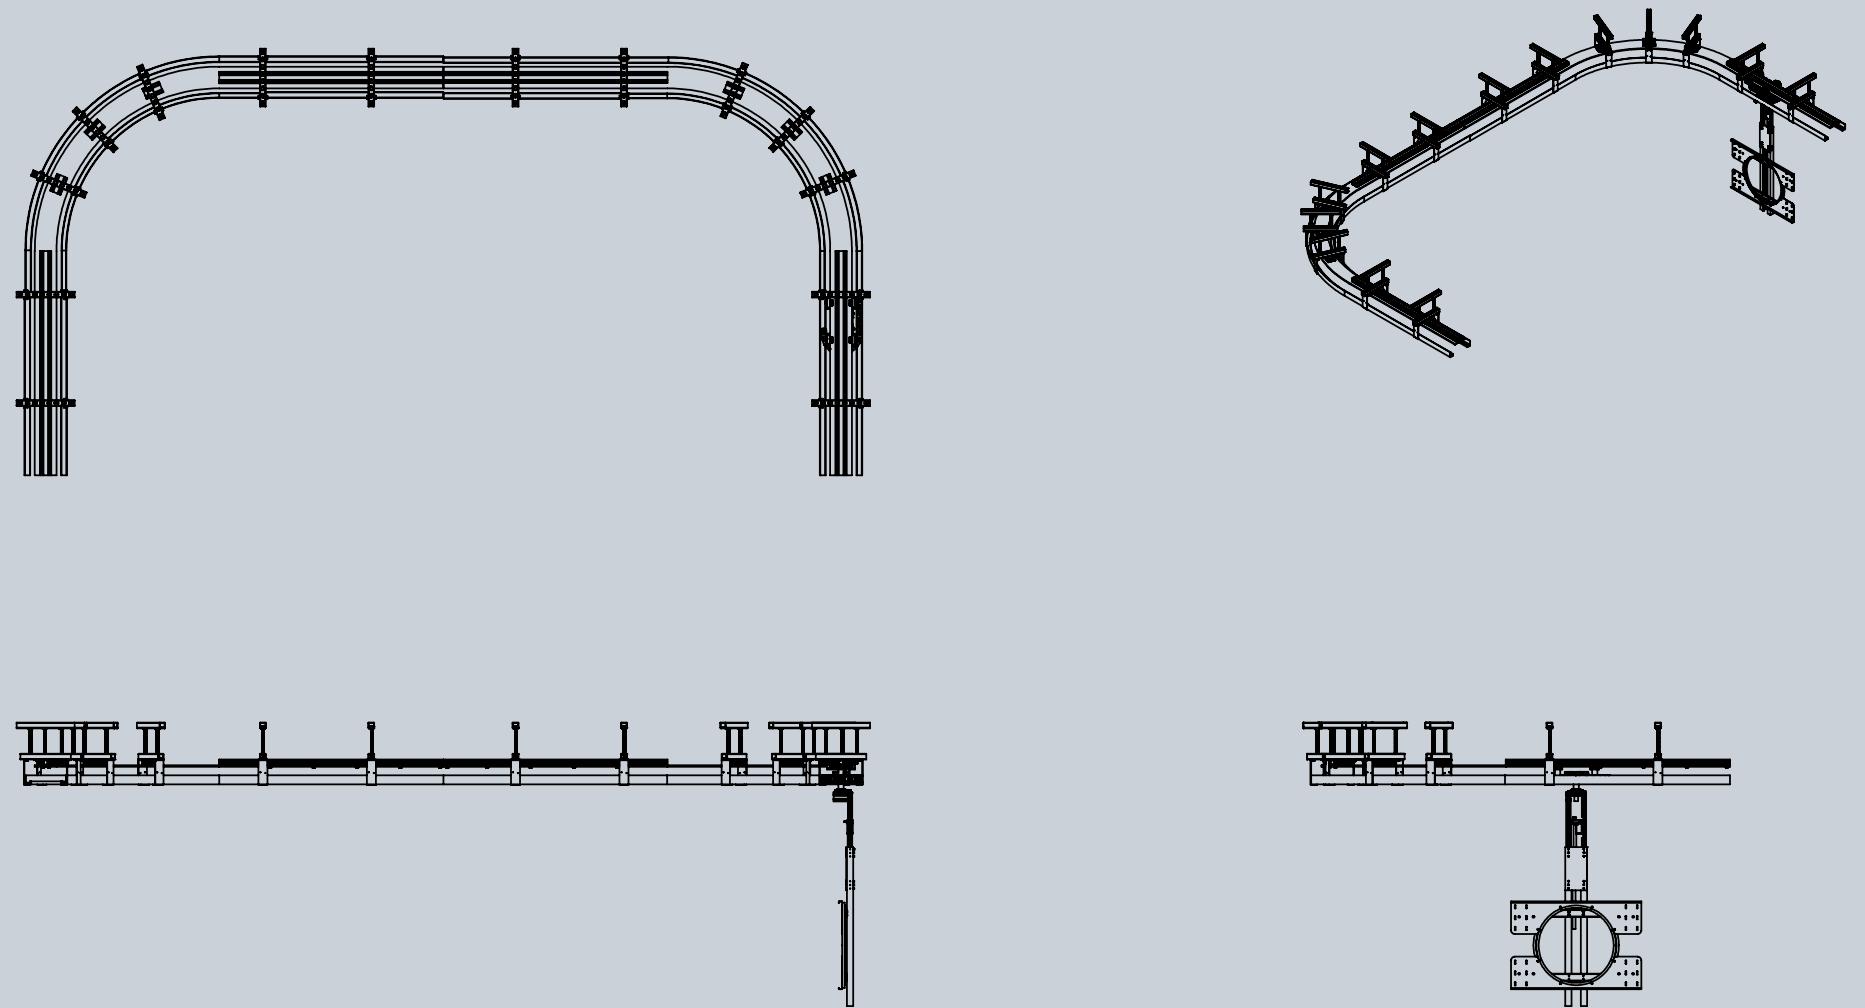

www.trak-kit.com

We had projects and spaces that needed the path of travel to make right or left turns or to be on curves of various radii.

So, we designed the TRAK-kit Turn Trak.

With this ultimate system, any path on the floor plan of a space can be achieved.

MPWS

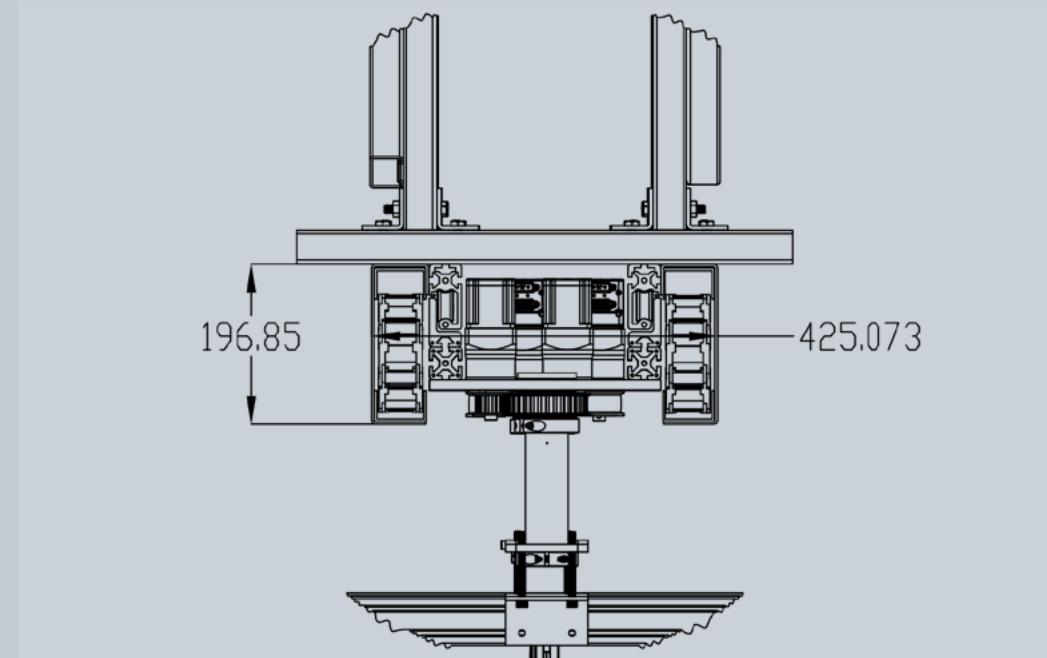

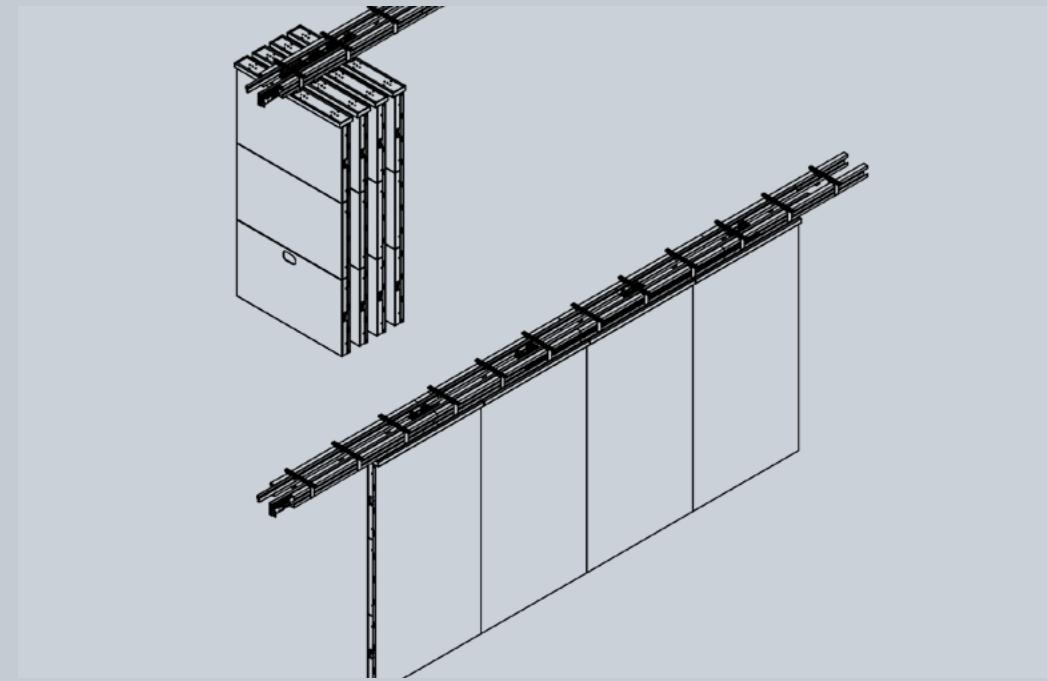

www.trak-kit.com

Since we had invented the technology to have large panels move with wire harness attached to them, we designed it to have multiple panels in the same Trak to divide rooms.

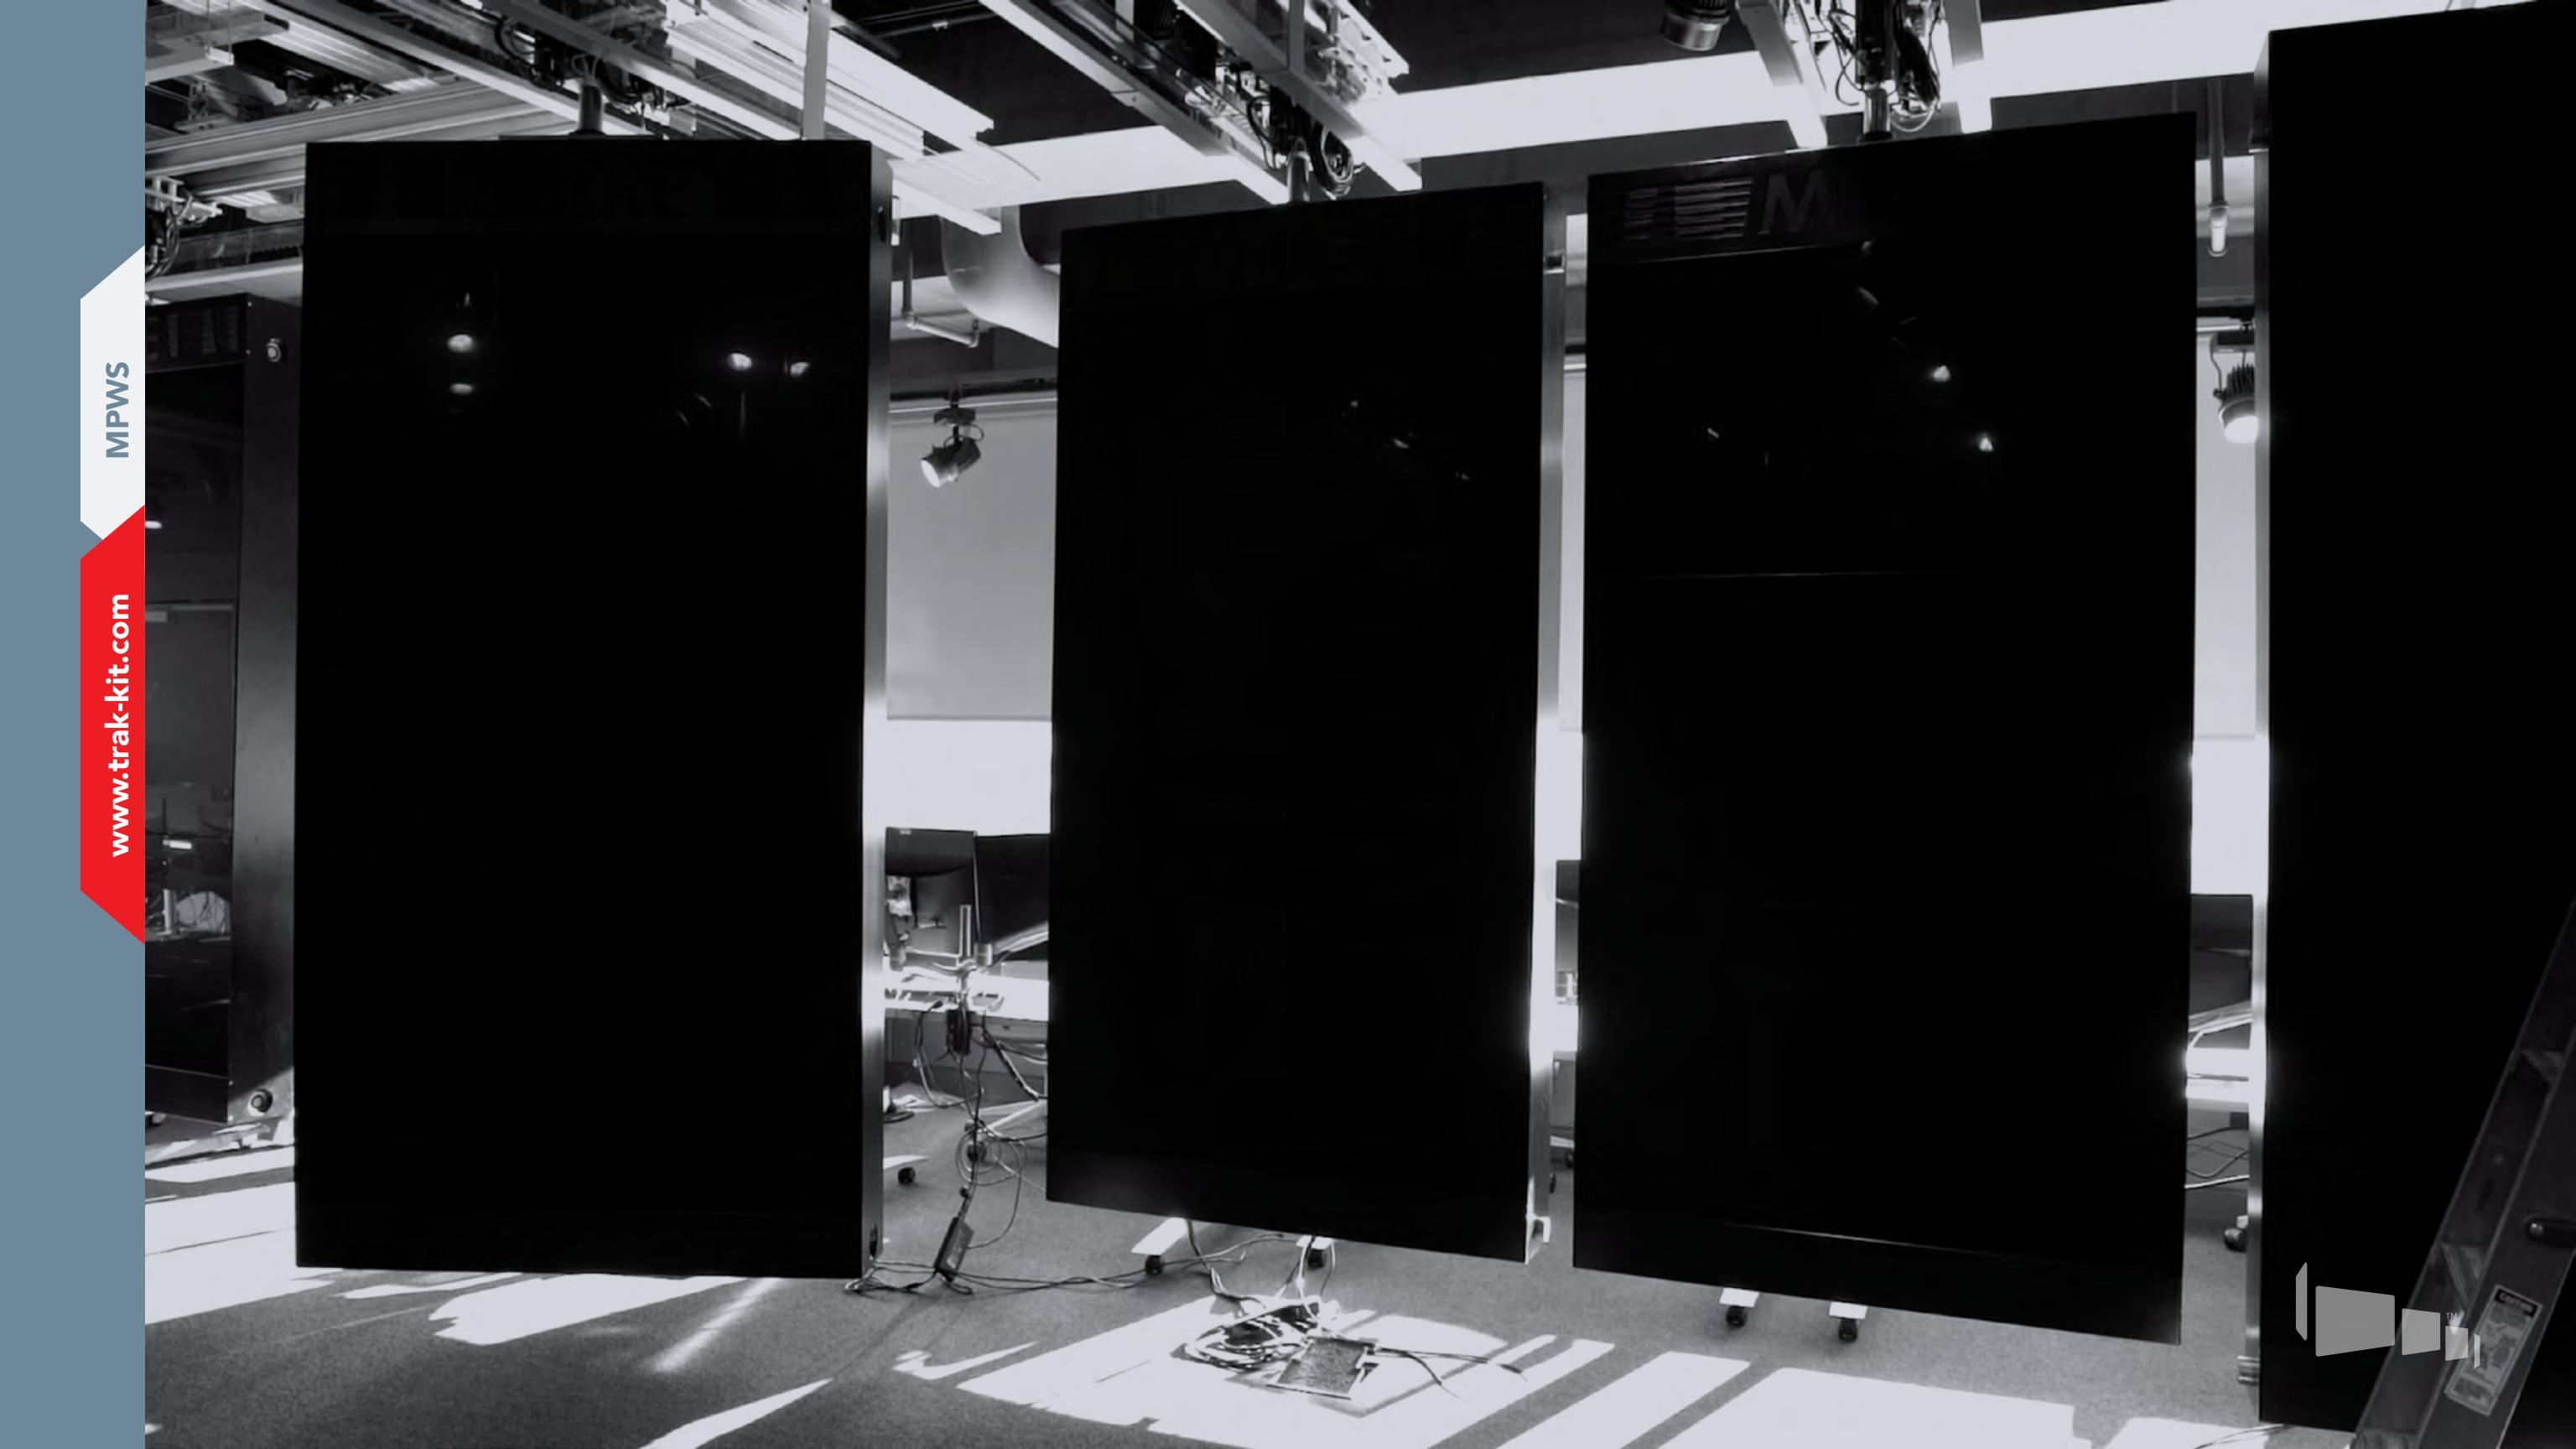

Residential and commercial spaces now can have large walls to separate them with the difference that each panel can have electrical, data and other signals running through.

Panels can also turn 360° and be able to face different rooms.

BRACKETS

www.trak-kit.com

TRAK-KIT BRACKETS

2026

TRAK-KIT : POLE BRACKET

- ELEGANT AND SIMPLE WITH ONLY A SIMPLE POLE COMING FROM TRAK
- UP TO 65" SCREENS ONLY
- UNIVERSAL VESA MOUNT
- 2" DEPTH PLUS SCREEN THICKNESS
- OPTION TO MOUNT ARTWORK ON THE BACK SIDE

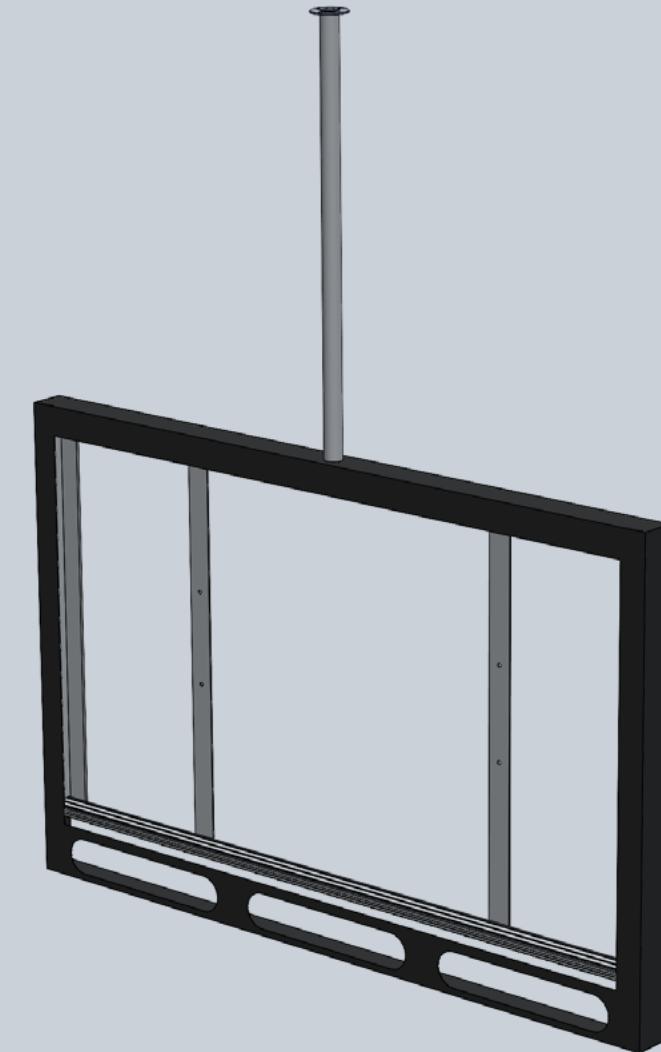

The pole bracket has only a pole coming down from the Trak.

The screen hangs in front of the pole so it looks clean and elegant at the top in ceiling.

Since screen is in front of the pole, the dept is greater in this case (screen plus 2.5").

TRAK-KIT : POLE / FRAME

- CUSTOM DESIGNED FRAME TO MAKE SCREEN LOOK LIKE HI-END FURNITURE
- CAN INCORPORATE SOUNDBAR IN DESIGN SEAMLESSLY
- CUSTOM FRAMES AND FINISHES AVAILABLE TO BLEND IN ANY INTERIOR
- CAN HAVE ARTWORK ON THE BACK SIDE WHEN PARKED ON WALL

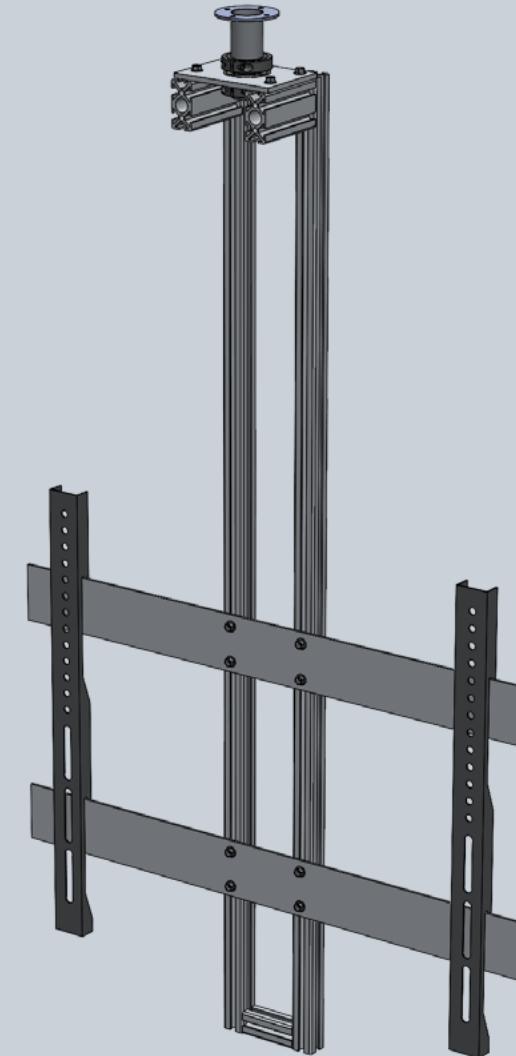

To make the pole Trak more sophisticated, we build a frame so that the screen, speakers... all can be inside the frame and artwork can be on the back side.

This will make the presentation look more like high-end furniture and less like audio/video.

The frame can be customized with various looks and finishes.

TRAK-KIT : OFFSET BRACKET

- FOR LARGER SCREENS UP TO 98"
- HEIGHT ADJUSTABLE WITHIN BRACKET
- OFFSET ADJUSTABLE FOR CENTER OF GRAVITY SO SCREEN HANGS PLUMB
- DEPTH 1 1/2" PLUS SCREEN

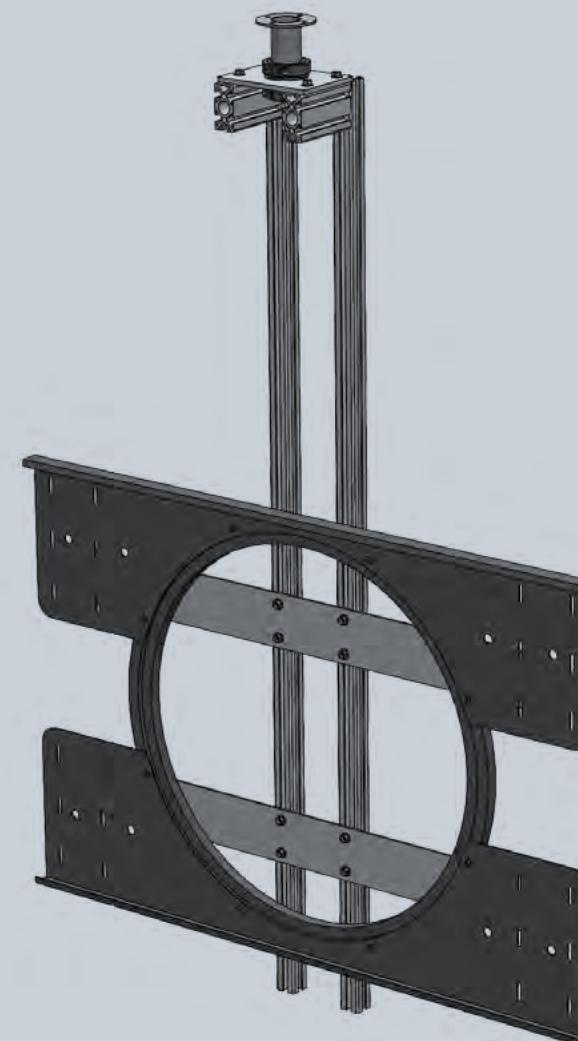

The bracket is designed to transition from pole so that the screen is under the pole, and this helps with center of gravity.

It also adds only 1 ½" to the back of the screen so that it is not too deep.

This also allows for height adjust-ability and larger screens up to 98".

TRAK-KIT : PORTRAIT TO LANDSCAPE BRACKET

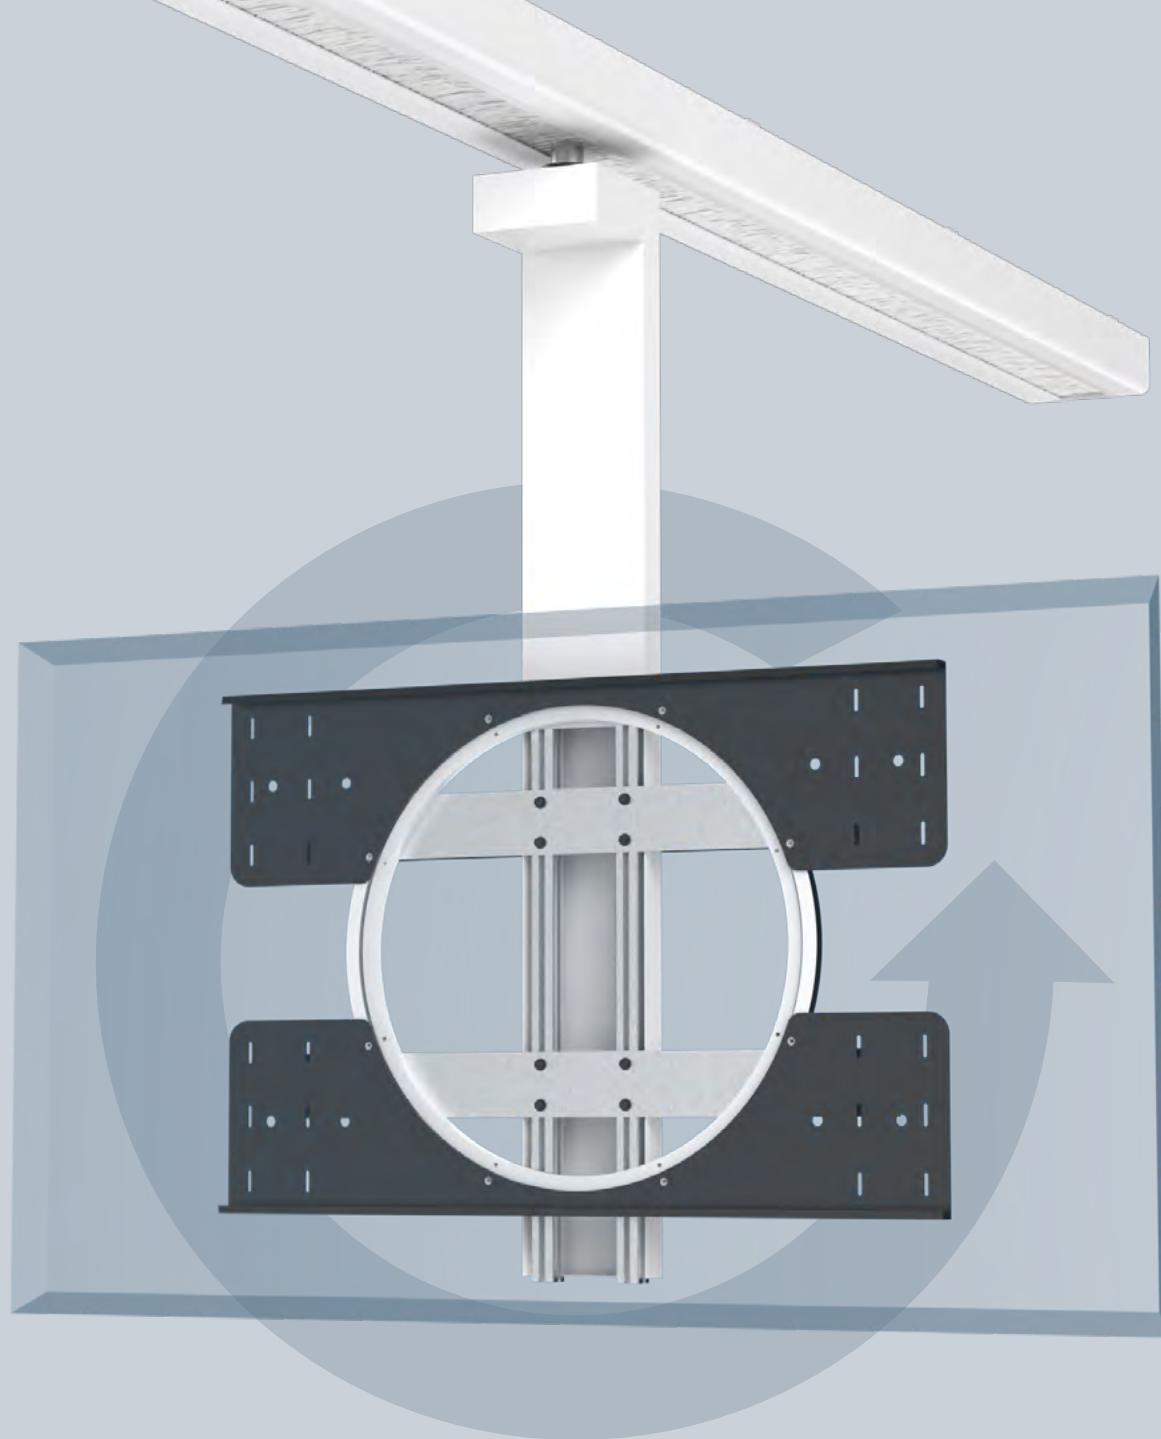

- FOR LARGER SCREENS UP TO 98"
- ALLOW SCREEN TO ROTATE TO VERTICAL FOR VIEWING AND EASIER TO STOW AWAY
- ALSO GREAT FOR RETAIL, PRESENTATION OF VERTICAL DOCUMENTS, ART
- OFFSET ADJUSTABLE FOR CENTER OF GRAVITY SO SCREEN HANGS PLUMB
- DEPTH 2 1/2 PLUS SCREEN

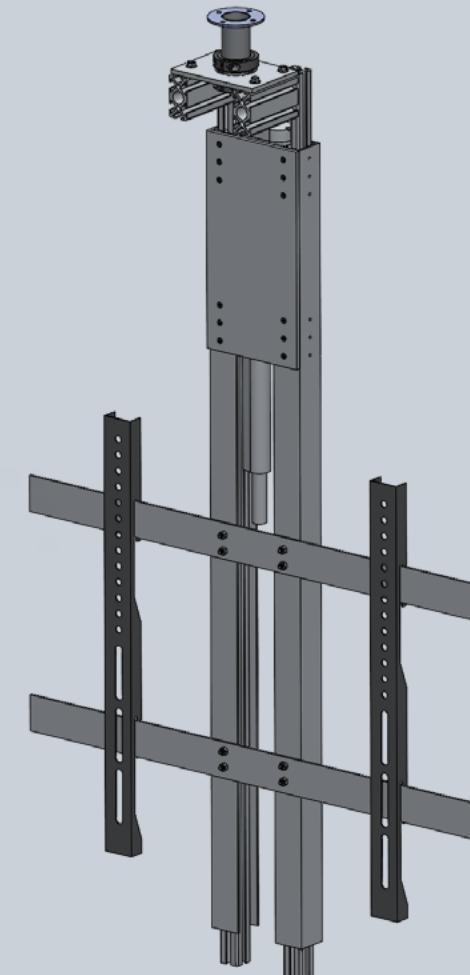

This feature will allow the screen to rotate from landscape to portrait.

Ideal for situations that require the video signal to be in portrait (fashion, art, presentation...)

It also allows the screen to occupy less width and be able to be parked and hidden easier, like a door.

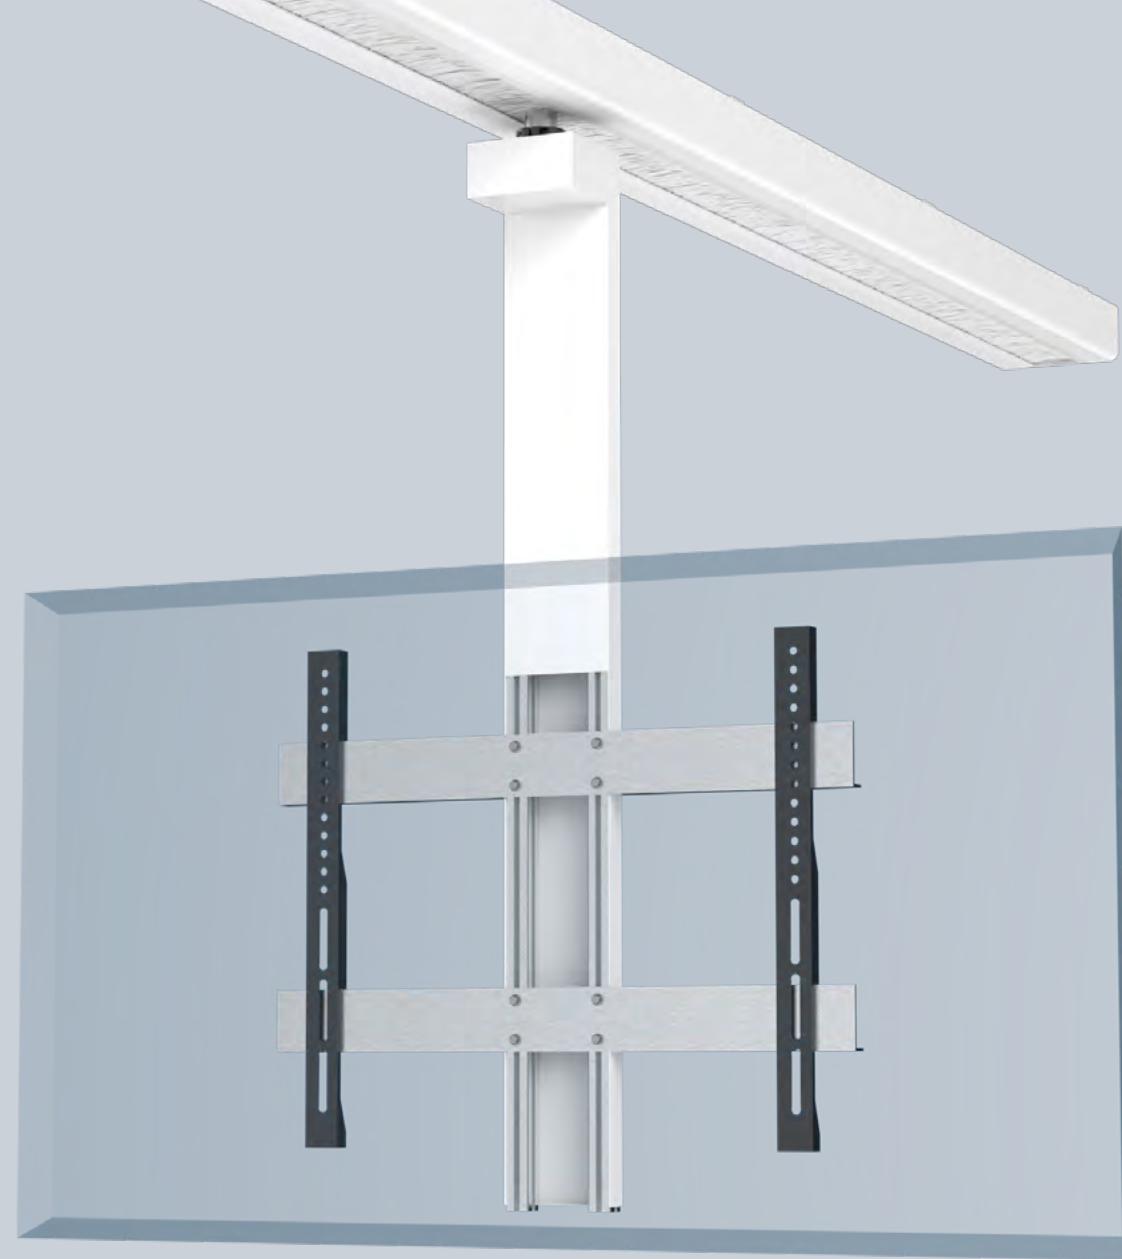

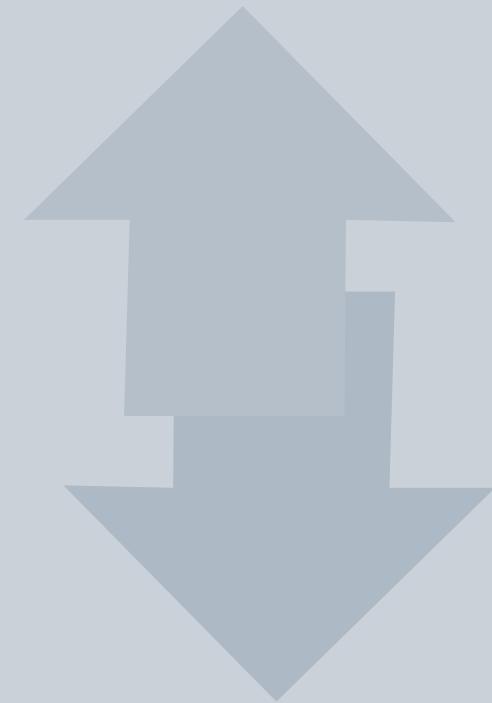

TRAK-KIT : UP AND DOWN BRACKET

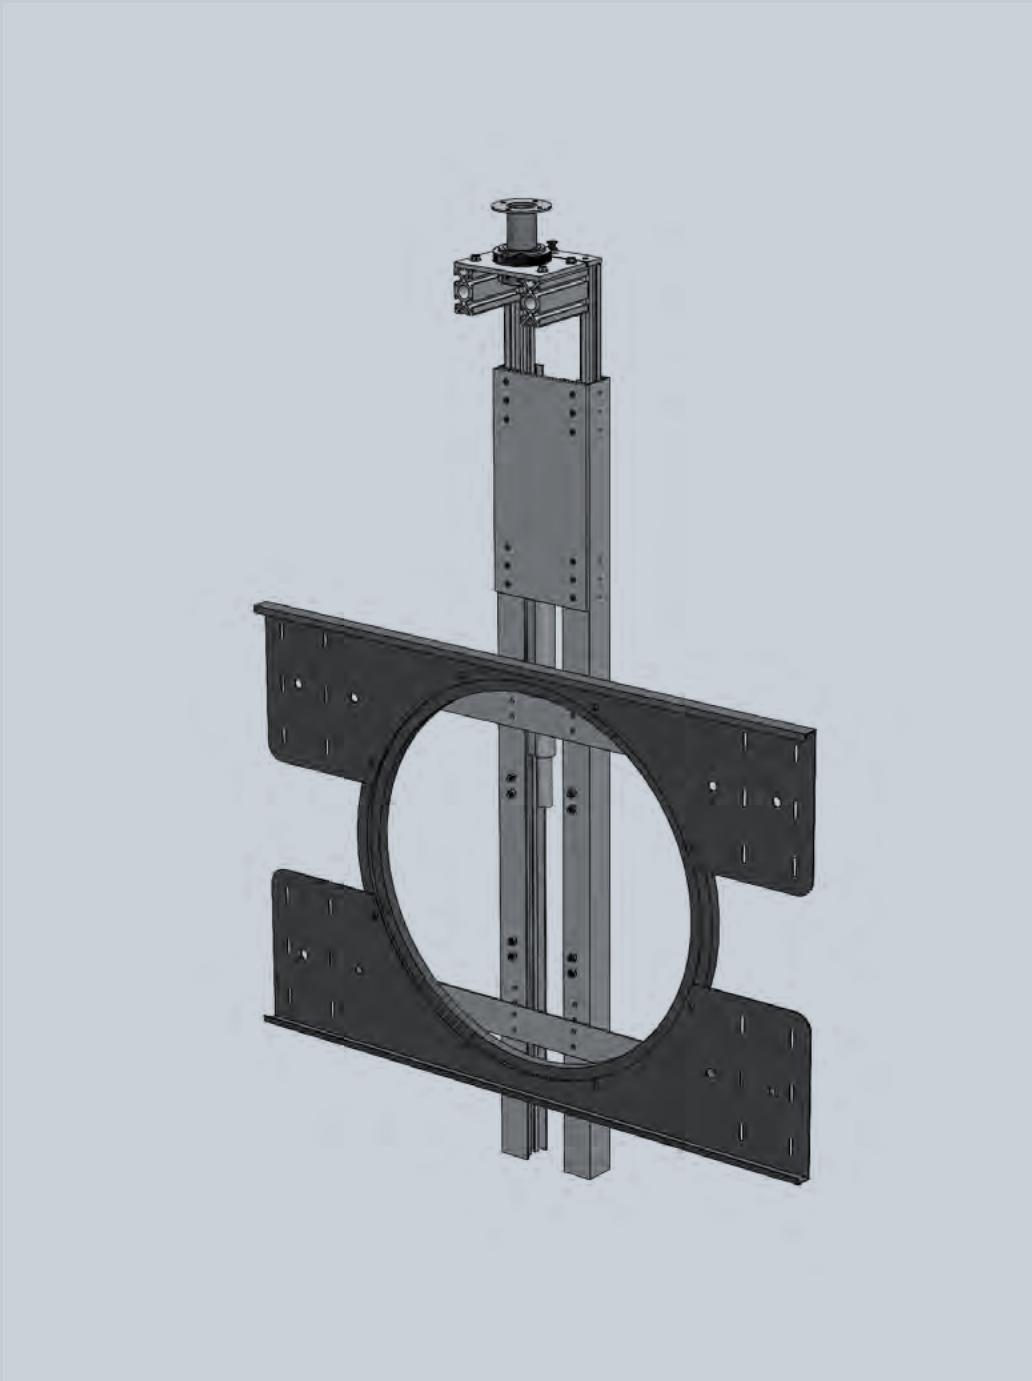

- FOR LARGER SCREENS UP TO 98"
- AUTO HEIGHT ADJUSTMENT 24" RANGE
- GREAT FOR PRESENTATIONS (SITTING) VS. VIDEO CONFERENCING (STANDING)
- OFFSET ADJUSTABLE FOR CENTER OF GRAVITY SO SCREEN HANGS PLUMB
- DEPTH 2 1/2" PLUS SCREEN

The addition of a vertical actuator offers the ability to move displays up and down by 30".

This application allows for comfortable viewing both sitting and standing, or for presentation and video conferencing, or simply to raise the screen up out of reach.

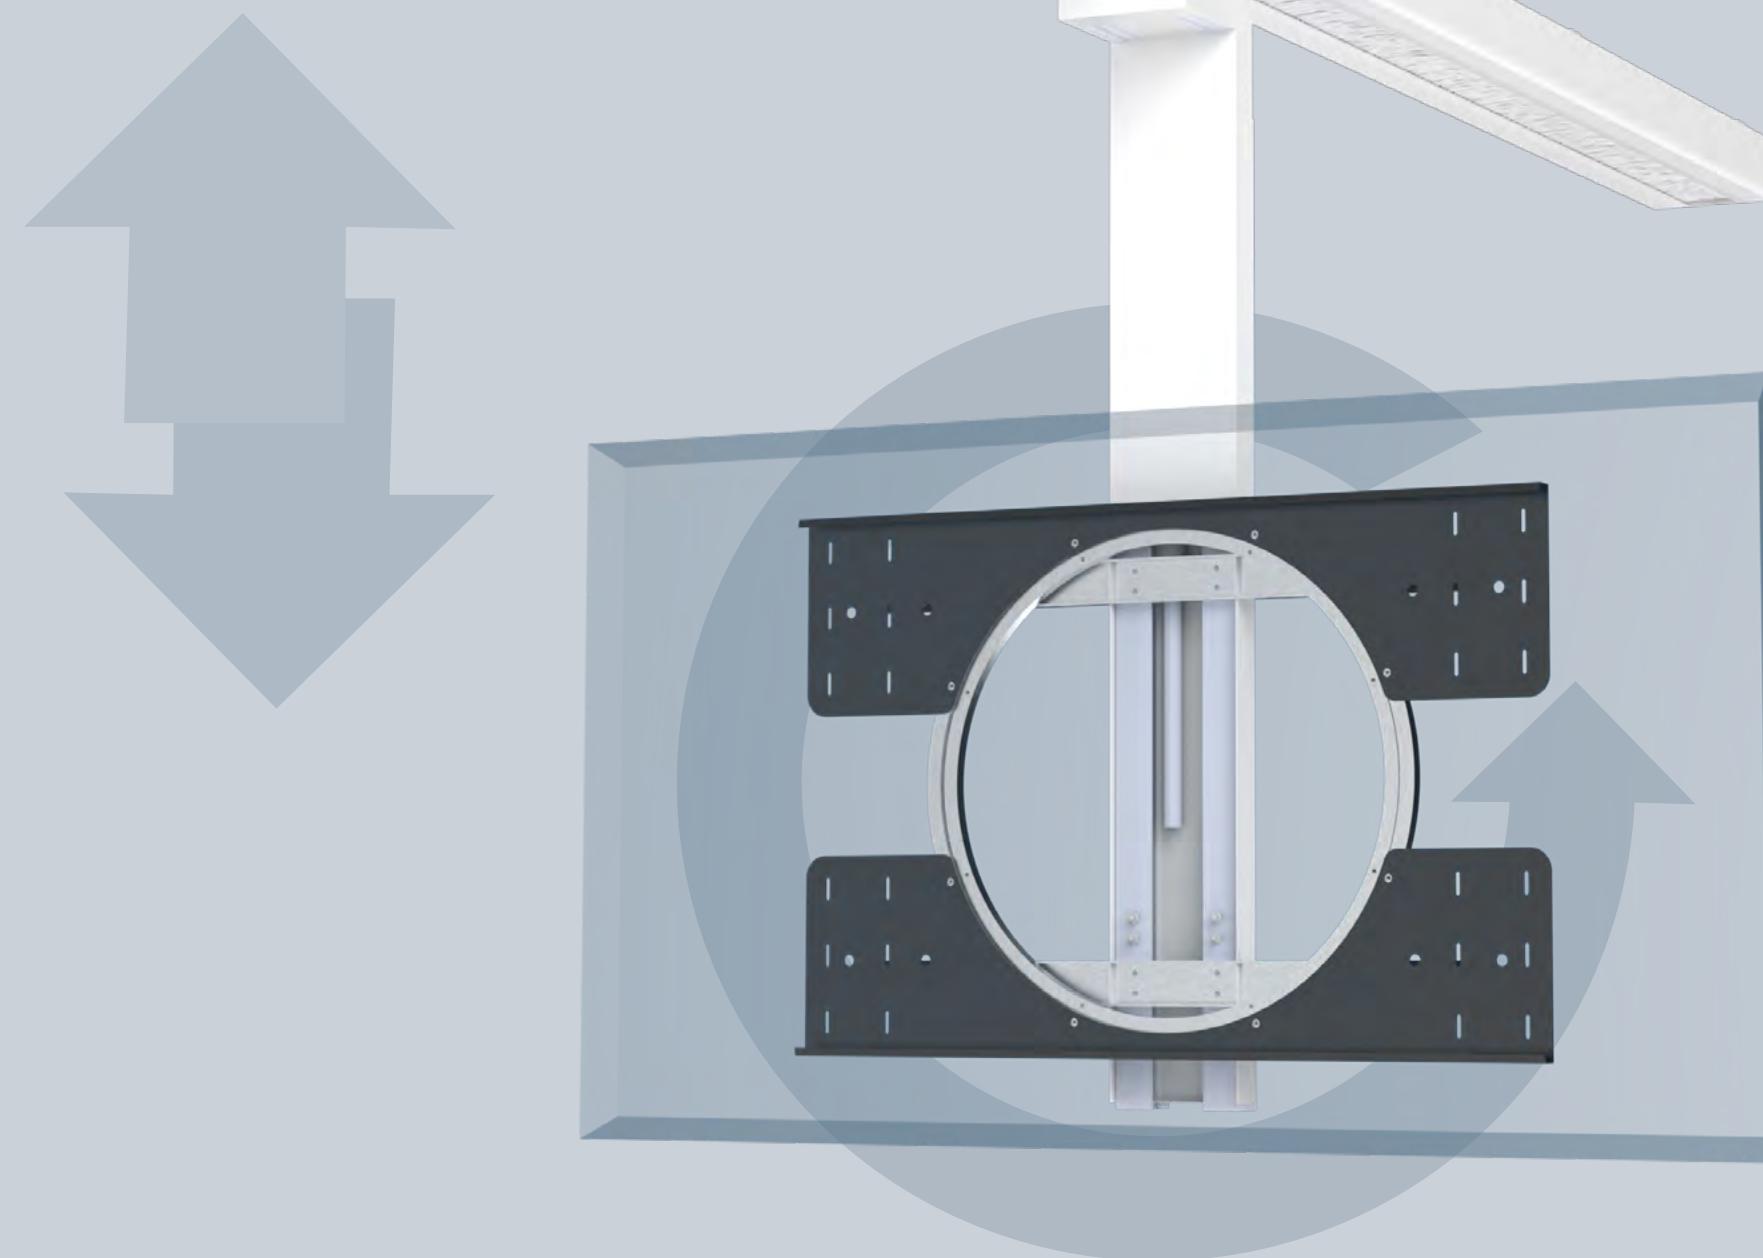

TRAK-KIT : PORTRAIT TO LANDSCAPE + UP/DOWN

- FOR LARGER SCREENS UP TO 98"
- COMBINES BOTH AUTO HEIGHT ADJUSTMENT & PORTRAIT TO LANDSCAPE
- OFFSET ADJUSTABLE FOR CENTER OF GRAVITY SO SCREEN HANGS PLUMB
- DEPTH 3" PLUS SCREEN

Finally combining
portrait to landscape
rotation and up/down
lifting you can have the
ultimate flexibility.
